Fixed Income Index Portfolio

Product Information

Portfolio Objective

To replicate the total return of the benchmark (i.e., the Barclays Capital U.S. Aggregate Bond Index) before expenses charged to the Portfolio.

Investment Philosophy

Investment Process

UBS Global Asset Management (Americas) Inc. uses an investment approach that attempts to replicate the investment characteristics of the Barclays Capital U.S. Aggregate Bond Index. The Portfolio Adviser closely monitors the Portfolio relative to the Index with regard to duration (interest rate sensitivity), industry and sector weightings, convexity, yield to maturity, liquidity and quality—the key factors that determine fixed income market performance. By monitoring these factors to build the Portfolio, the Portfolio Adviser seeks to maximize the likelihood that the Portfolio's return will "track" or replicate the performance of the benchmark.

The Barclays Capital U.S. Aggregate Bond Index is a compilation of bonds intended to represent the performance of the fixed income market, excluding non-investment grade securities. The Index contains generic mortgage (pass-through) bonds such as those issued by GNMA, investment grade corporate securities and U.S. Government Agency and Treasury bonds.

Special Considerations

Investors in the Portfolio should be able to withstand short-term fluctuations in the fixed income markets. The yield and value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan. The bond values in this Portfolio will decline as interest rates rise and vice versa.

Additional Information

All returns shown are time-weighted and include the reinvestment of income. Gross returns shown reflect performance without the deduction of Wilmington Trust Fiduciary Services Company fees for investment management and trust services.

Net returns shown reflect the quarterly deduction from gross returns of fees paid to Wilmington Trust Fiduciary Services Company on index Portfolios by all Wilmington Trust Fiduciary Services Company clients during the applicable period. Fees charged to any particular account may vary and an account may have paid more or less than the amount used to reduce the gross returns, therefore, this representation of performance is not intended to reflect the actual performance an account would experience. The deduction of fees and the compounding effect of such deductions over time will reduce an account's performance on a cumulative basis as will timing and other individual account factors. An account that paid the highest fee payable for this Portfolio would have experienced a return of 6.18% for 3 years, 5.84% for 5 years, and 4.99% for 10 years. Contact your Financial Advisor for information about the Wilmington Trust Fiduciary Services Company fees.

The Barclays Capital U.S. Aggregate Bond Index is an unmanaged broad-based bond index comprised of U.S. Treasury, agency, investment grade (rated Baa3/BBB- or higher) U.S. corporate, mortgage and asset-backed issues having at least one year to maturity and at least \$250 million par amount outstanding. The Barclays Capital U.S. Aggregate Bond Index is provided by Zephyr Associates. Barclays Capital is the owner of the trademarks, service marks, and copyrights related to its indexes.

The permissible investments for this Portfolio are set forth in the Portfolio Disclosure Document (PDD) under the Wilmington Trust Fiduciary Services Company Collective Investment Trust for Employee Benefit Plans (CIT). The PDD and the Declaration of Trust for the Wilmington Trust Fiduciary Services Company CIT govern the management of the Portfolio and should be read in conjunction with this Adviser Profile. For additional information, contact your Financial Advisor. The units of the Portfolio are not deposits or obligations of Wilmington Trust Fiduciary Services Company or any bank. The value of the Portfolio is not guaranteed by the Federal Deposit Insurance Corporation or by any other Governmental agency. The units are subject to investment risk, including possible loss of principal invested. Past performance is no guarantee of future results.

Current performance may be lower or higher than the figures shown. Effective March 17, 2008, some changes were made to the daily valuation methodology of the Portfolio that affect the returns of the Portfolio for the first quarter of 2008. As a result, the returns of the Portfolio may differ from the composite returns of the Portfolio Adviser for that period. For additional information, please contact Wilmington Trust Fiduciary Services Company.
