Portfolio Disclosure Document

Strategic Balanced Portfolio

Objective

To generate a total return in excess of the Benchmark over a full market cycle.

Benchmark

60% S&P 500® Index/40% Lehman Brothers Intermediate Government/Credit Bond Index

Method

To invest in a blend of equity and fixed income securities by systematically integrating a macroeconomic outlook with individual security analysis. The equity portion of the Portfolio is expected to concentrate on securities with a market capitalization over \$500 million in industry groups phasing into or out of earnings cycles. Comparative analysis of currencies, inflation rates, GDP momentum and geopolitical changes coupled with fundamental bottom-up security research, is an ongoing process, as is the flow of funds between equities and fixed income sectors. The Portfolio also seeks to make active asset allocation decisions in anticipation of interest rate changes.

Permissible Investments
