

# US Allocation Portfolio

## Objective

To generate a total return in excess of the UBS Global Asset Management US Balanced Index over a full market cycle.

## About the Portfolio<sup>1</sup>

The Portfolio is expected to be invested solely in units of the UBS U.S. Balanced Collective Fund (the "Fund") of the UBS (US) Group Trust. UBS Global Asset Management Trust Company serves as Trustee to the UBS (US) Group Trust.

The Fund follows an active asset allocation strategy which increases or decreases investments in the U.S. equity and debt markets based upon the Portfolio Adviser's ongoing fundamental, value-based analysis. Its active management process combines judgments about the intrinsic value of the stock and bond markets and the relative value of a wide variety of securities within both markets. In addition to fundamental, valuation-based analysis, under certain circumstances the Fund may utilize other strategies with different principal investment approaches in order to manage its overall risk/return exposures. For example, the Fund may invest in growth-oriented or other specialized strategies for a portion of the allocation to manage risk exposures; but only after subjecting such strategies to a rigorous due diligence process to judge their suitability for the Fund.

The asset class ranges for the Fund are generally expected to be as follows:

- US equity: 20%–90%
- High yield bonds: 0%–15%
- US fixed income: 0%–70%
- Cash equivalents: 0%–50%

The Fund's equity investments are primarily large-cap securities and the fixed income investments generally include investment grade securities. High yield investments may include lower-rated, higher-yielding securities. Cash equivalents are primarily short-term fixed income or money market securities. In lieu of direct investment in securities, the Fund typically obtains exposure to investments through a combination of investments in the UBS Global Asset Management Trust Company Collective Funds under the UBS (US) Group Trust and the UBS Relationship Funds. The Fund may invest in the UBS U.S. All Cap Equity Collective Fund, UBS U.S. Large Cap Growth Equity Collective Fund, UBS U.S. Bond Collective Fund, UBS U.S. High Yield Relationship Fund and UBS U.S. Cash Prime Management Collective Fund. The Fund may also directly hold derivative securities such as futures contracts for overall portfolio strategic purposes.

## Top Account Holdings as of 12/31/09

Apple Inc	Pfizer
Covidien PLC	Wells Fargo And Co
Microsoft Corporation	Procter & Gamble
JP Morgan Chase & Company	Allergan
US Treasury Note 11/30/2014	Fedex Corp

## Special Considerations

Investors in the Portfolio should be able to withstand short-term fluctuations in the equity markets in return for potentially higher returns over the long term as well as short-term fluctuations in the fixed income markets. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. The Portfolio may also invest in high-yield securities, which are generally considered to be speculative with respect to the payment of interest and the return of principal and involve greater risks than higher-grade issues. They are especially subject to adverse changes in general market conditions and in the industries in which the issuers are engaged, to changes in the financial condition of the issuers and to price fluctuations in response to changes in interest rates. The bond values in the Portfolio will decline as interest rates rise and vice versa. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan.

### Footnotes

1. The descriptions and disclosures contained in this profile are that of the UBS U.S. Balanced Collective Fund. The permissible investments for this Portfolio are set forth in the Portfolio Disclosure Document (PDD) under the Wilmington Trust Fiduciary Services Company Collective Investment Trust for Employee Benefit Plans. The PDD and the Declaration of Trust for the Wilmington Trust Fiduciary Services Company Collective Investment Trust govern the management of the Portfolio and should be read in conjunction with this Profile. For additional information, including the governing documents of the Fund in which the Portfolio invests, contact your Financial Advisor.

The units of the Portfolio are not deposits or obligations of Wilmington Trust Fiduciary Services Company or any bank. The value of the Portfolio is not guaranteed by the FDIC or by any other Governmental agency. The units are subject to investment risk, including possible loss of principal invested.

2. All returns shown are time-weighted and include the reinvestment of income. Because the investment strategy used for the Portfolio changed on 3/1/04, the returns experienced by the US Allocation Portfolio were different than the returns shown. Please contact Wilmington Trust Fiduciary Services Company for further information. Gross returns shown for the period prior to that date reflect the performance (less commissions on securities transactions but not of investment management or other fees) of a composite of accounts managed by the Portfolio Adviser using an investment style similar to the one now used in the Portfolio. This information has been provided to Wilmington Trust Fiduciary Services Company by the Portfolio Adviser. It is believed accurate but has not been independently verified by Wilmington Trust Fiduciary Services Company.

Gross returns shown for the period after 3/1/04 reflect performance without the deduction of Wilmington Trust Fiduciary Services Company fees for trust and investment management services.

Net returns shown reflect the quarterly deduction from gross returns of fees paid to Wilmington Trust Fiduciary Services Company on equity and balanced Portfolios by all Wilmington Trust Fiduciary Services Company clients during the applicable period. Fees

charged to any particular account may vary, and an account may have paid more or less than the amount used to reduce the gross returns, therefore, this representation of performance is not intended to reflect the actual performance an account would experience. The deduction of fees and the compounding effect of such deductions over time will reduce an account's performance on a cumulative basis as will timing and other individual account factors. An account that paid the highest fee payable for this Portfolio would have experienced a return of -6.89% for 3 years, -1.76% for 5 years, and 2.12% for 10 years. Please contact your employer for information about the Wilmington Trust Fiduciary Services Company fees charged to your plan's account.

3. The UBS Global Asset Management US Balanced Index is the benchmark against which the Portfolio is measured. The Index blend is currently 65% Russell 3000 Index/30% Barclays Capital U.S. Aggregate Bond Index/5% Merrill Lynch High Yield Cash Pay Index. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. The Barclays Capital U.S. Aggregate Bond Index is composed of securities from the Barclays Capital Government/Credit Index, the Barclays Capital Mortgage-Backed Securities Index and the Barclays Capital Asset-Backed Securities Index. The Government/Credit Index is composed of bonds that are investment grade or higher; issues must have at least one year to maturity. The Mortgage-Backed Securities Index consists of fixed-rate, securitized mortgage pools backed by the Government National Mortgage Association (GNMA), the Federal Home Loan Mortgage Corporation (FHLMC), including GNMA Graduated Payment Mortgages. The Asset-Backed Securities Index is composed of credit card, auto and home equity loans; included in the index are pass-through, bullet (noncallable), and controlled amortization structures; no subordinated tranches are included; all securities have an average life of at least one year. The Merrill Lynch Master High Yield Cash Pay Only Index tracks the performance of below investment grade US dollar-denominated corporate bonds publicly issued in the US domestic market. Total return comprises price appreciation/depreciation and income as a percentage of the original investment. Data for blended index is provided by UBS Global Asset Management.
